

Informed Consent to Obtain Medication History

Consultants in Pain Medicine, PA has adopted an electronic medical record system in order to improve the quality of our services. This system also allows us to collect and review your "medication history." A medication history is a list of prescription medicines that we or other doctors have recently prescribed for you. This list is collected from a variety of sources, including your pharmacy and your health insurer. An accurate medication history is very important to helping us treat you properly and in avoiding potentially dangerous drug interactions.

By signing this consent form you give us permission to collect, and give your pharmacy and your health plan permission to disclose, information about your prescriptions that have been filled at any pharmacy or covered by any health insurance plan. This includes prescription medicines to treat AIDS/HIV and medicines used to treat mental health conditions, such as depression. This information will become part of your medical record.

This medication history is a useful guide, but it may not be completely accurate. Some pharmacies do not make drug history available to us, and the drug history from your health plan might not include drugs that you purchased without using your health insurance. Your medication history might not include over the counter medicines, supplements or herbal remedies. It is still very important for us to take the time to discuss everything you are taking, and for you to point out to us any errors in your medication history.

Patient Acknowledgement

By signing below, I give permission for Consultants in Pain Medicine, PA to obtain my medication history from my pharmacy, my health plans and other healthcare providers.
